

## Low Carbon Buildings: *What About Health and Wellbeing?*

In a world dominated by debates on an energy insecure future, climate change and unstable economies, this Conference addresses research evidence and case studies on the trade-offs between indoor environmental quality, energy/carbon use and health/productivity.

Topics include:

- The role of building design, maintenance and occupant behaviour on ventilation, indoor air quality and the transmission and control of infectious diseases
- Low carbon design: impacts on health and wellbeing
- Latest evidence and good practice on healthy housing

Invited speakers are:

- Prof. Rajat Gupta, Oxford Brookes University  
*"Ventilation, IAQ and overheating: insights from POE studies of sustainable social housing"*
- Prof. Malcolm Cook, Loughborough University  
*"Modelling energy and IAQ"*
- Melissa Taylor, Good Homes Alliance  
*"Investigating and reporting overheating, including remediation techniques"*

The Conference will include a poster session, discussion and networking. The UKIEG AGM will take place during the lunch break.
