

# Personalisation in ACTION

## Co-production

Technology enabled services need to be proactive and co-produced with people, their families and carers.

## Workforce, vision and leadership

Digital infrastructure, skills and approaches in social care must improve so individuals and the care workforce can maximise digital opportunities.

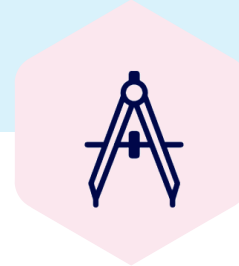

## Standards

We should work with technology providers and other adult social care stakeholders to drive the adoption of quality standards.

## Evidence evaluation and benefits realisation

Wellbeing and cost benefits continuously collated

## Creation of the blueprint

What good looks like

Hands on Support in the community

Delivery of a Personalised Care Innovation Programme
