# Connected Care:

Make Better Informed Care Decisions

Paul Berney

Chief Commercial Officer  
October 2023

Anthropos

## The key question:

How can we help you to support older people to stay safe, well and independent in a place of their choosing for longer?

## How?

By providing intelligence that supports making better informed care decisions

# Supporting the move towards new models of care

PAST  
A combination of  
physical care and  
reactive services  
only

NOW  
A blend of  
physical care,  
proactive care  
and reactive care  
services

NEXT  
A blend of physical  
care, proactive care  
and reactive care  
services  
informed by data and  
predictive insights

# Why shift to a more proactive service model?

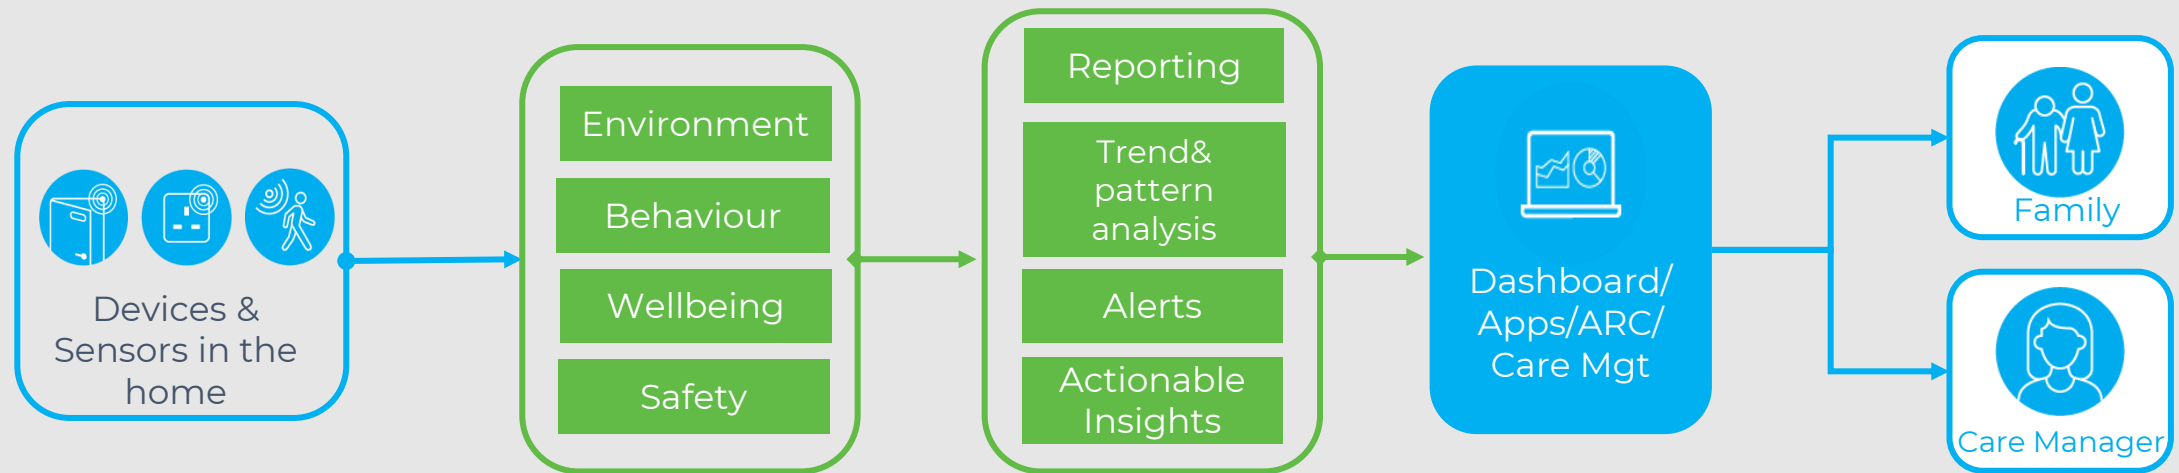

Support more person centric care models

Reduce avoidable admission/readmissions to hospital

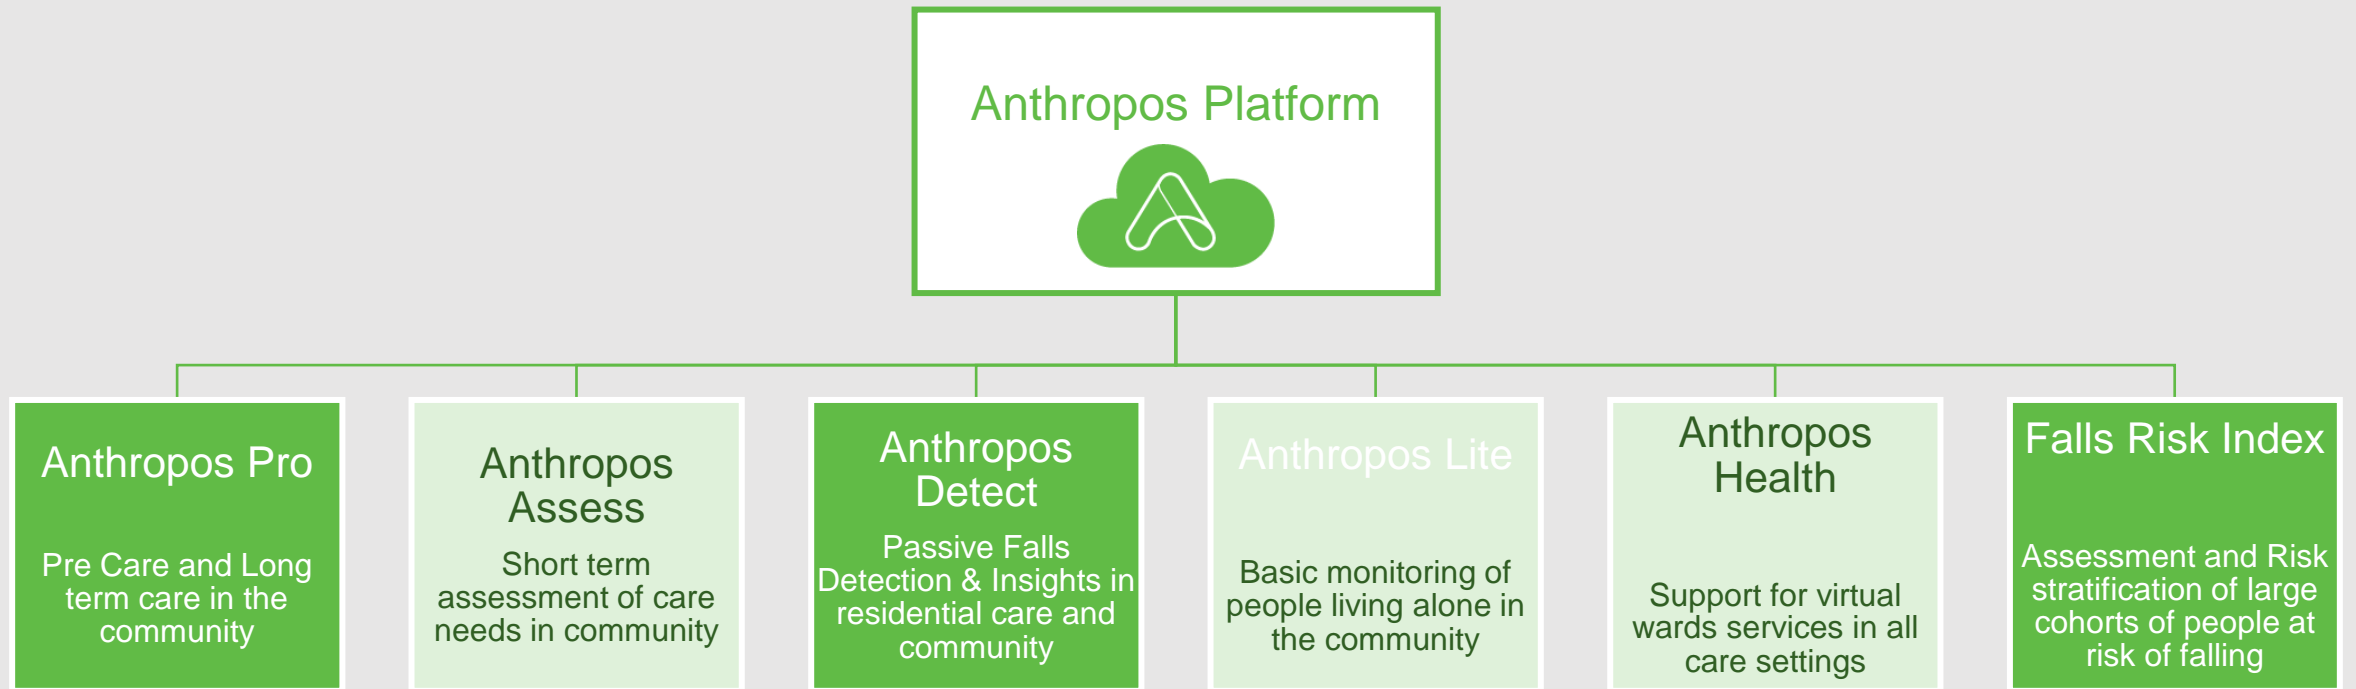

Support the delivery of better care experiences and better personalised care outcomes

Support effective capacity management

# How Anthropos works

# The Anthropos product suite

# The base set of devices and sensors

**Motion  
Sensors**

**Door Sensors**

**Fridge  
Sensor**

**Smartplug  
for  
Microwave**

**Passive Fall  
Sensor**

**Smartplug  
for Kettle**

**Room  
Thermometers**

# Examples of Alerts and Actionable Insights

First morning activity not detected

Fall detected

No movement in a room

Fridge opened less frequently

Kettle used less frequently

Microwave used less frequently

Too long in a room

Door left open

Increased Activity at Night

Rooms too hot / cold

Increased / decreased bathroom visits

# Additional Insights in Reports

- Rise time
- Bed time
- Time in bed
- Number of times out of bedroom in the night

- Number of bathroom visits

- Number of front door opens per day
- Number of back door opens per day

- Kettle/fridge /microwave use

# Connected Care Roadmap

More  
connected  
devices

More  
analytical  
power

Integration  
with other  
systems

Enabling combined  
solutions for housing,  
health & social care

## Connected Care

Provides intelligence that supports making better informed care decisions

# Customer Impact

How has the technology supported you to live independently?

“the care team can see how I am doing and when I need support, this gives me confidence I am getting the right help to live in my own flat”

“The sensor technology, and more importantly understanding how it works, gives me the peace of mind that I am getting the right support at the right time to support me live independently in my own flat”

“My family are able to see that I am okay and stop them from worrying about me too much, this makes me happy to know that they are comfortable with me living in my own home”
