Pumpkin Spice Latte

God bless you for doing this for Brian! He needs
looking after. He probably has no one and
maybe has a touch of dementia. 🥺🙏

Lights on nobody
home

If only I lived near
and would take him
under my wing 🥰

Awww Brian 🥺 what a
precious soul 🤝

This made me cry i just know he really
appreciates it although he doesn't fully
understand what just happened

Can we wrap Brian up
in cotton wool? He's
so sweet ❤️

Awh his little grin at
the end you made his
day 🥺🥰

It's a shame when you get to an old age you end
up basically lost for your surroundings and
what people are saying to you

“What people really want to know about the future... is what their level of happiness and well-being will be”

(Wilson and Gilbert, 2003, p.346)

1 in 3 people believe
retirement housing is
synonymous with an 'Old
People's Home'

(Shakespeare Martineau, 2021)

Confronting and challenging the stigma of ageing

Facilitating access to a wide range of proxy experiences, including care settings

Increased insight into 'future work' and how our skills may be improved and errors reduced

Encouraging debate, discussion and dialogue at all stages and including the most dread topics.

Increasing access to advice and information in tolerable and useful forms.
