# Reimagining how we live together

Learning from intergenerational  
communal housing within **Australia**  
and the **United States**

Savannah Fishel

---

# Santa Rosa Creek Commons

Intentional community where everyone is a stakeholder and manager

"I look out my window and see my kid pop into other apartments, talk to anybody and be herself... She is **accepted**, **encouraged** and **thanked**, and understands **boundaries**."

Residents are people interested in cohousing

Around 30 residents aged 0 - 80

Move in year: 2000

Urban

Not low income, but rates are about half of market rate, a limited equity coop meaning all shareholders collectively own the community not their own units

"I know if I need something, people are **there**."

Quotes from current residents

Photos from website and submitted by community

I conducted 53 visits to intentionally intergenerational, community-orientated permanent housing models with a mix of private and shared spaces, guided by the following questions:

- Within increasingly individualistic societies, what intergenerational communal housing **models** exist and what **benefits** to they bring?
- Within intentional intergenerational communities what conditions contribute to **social cohesion between generations**? Which strategies, interventions or designs are effective in mitigating friction and help a community to thrive?

I acknowledge the **Traditional Owners** of the land in both Australia and the US, recognising the enduring impacts of **colonisation**, and that these lands were never ceded.

**Hi!**  
I'm Savannah.

I'M VISITING FROM THE UK FOR A FUNDED **RESEARCH** PROJECT ON DIFFERENT APPROACHES TO **COMMUNAL LIVING**

the **CHURCHILL** fellowship

**Researching Communal Living**

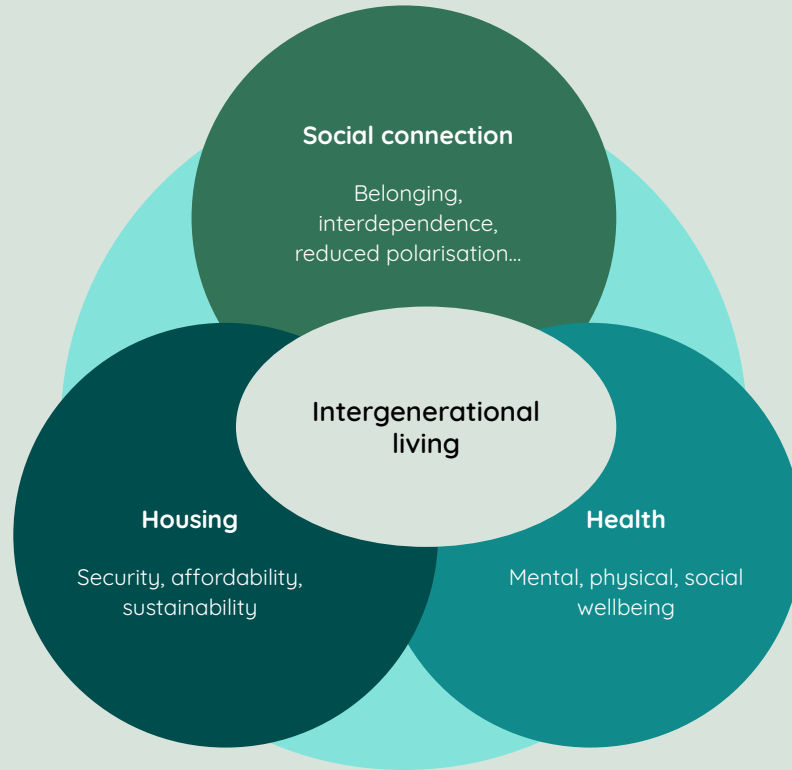

**Why I'm here**

I am exploring how alternative types of housing can bring people together, with a special interest in **community living** across **different age groups**. I am eager to have conversations and take part in, or observe, day-to-day activities as much as feels right. I would love to hear about your experiences; if you would like to share I am here to **listen and learn**.

I will not share personal details or photos without consent. I will respect your privacy. Feel free to get in touch with questions.

# Why this project?

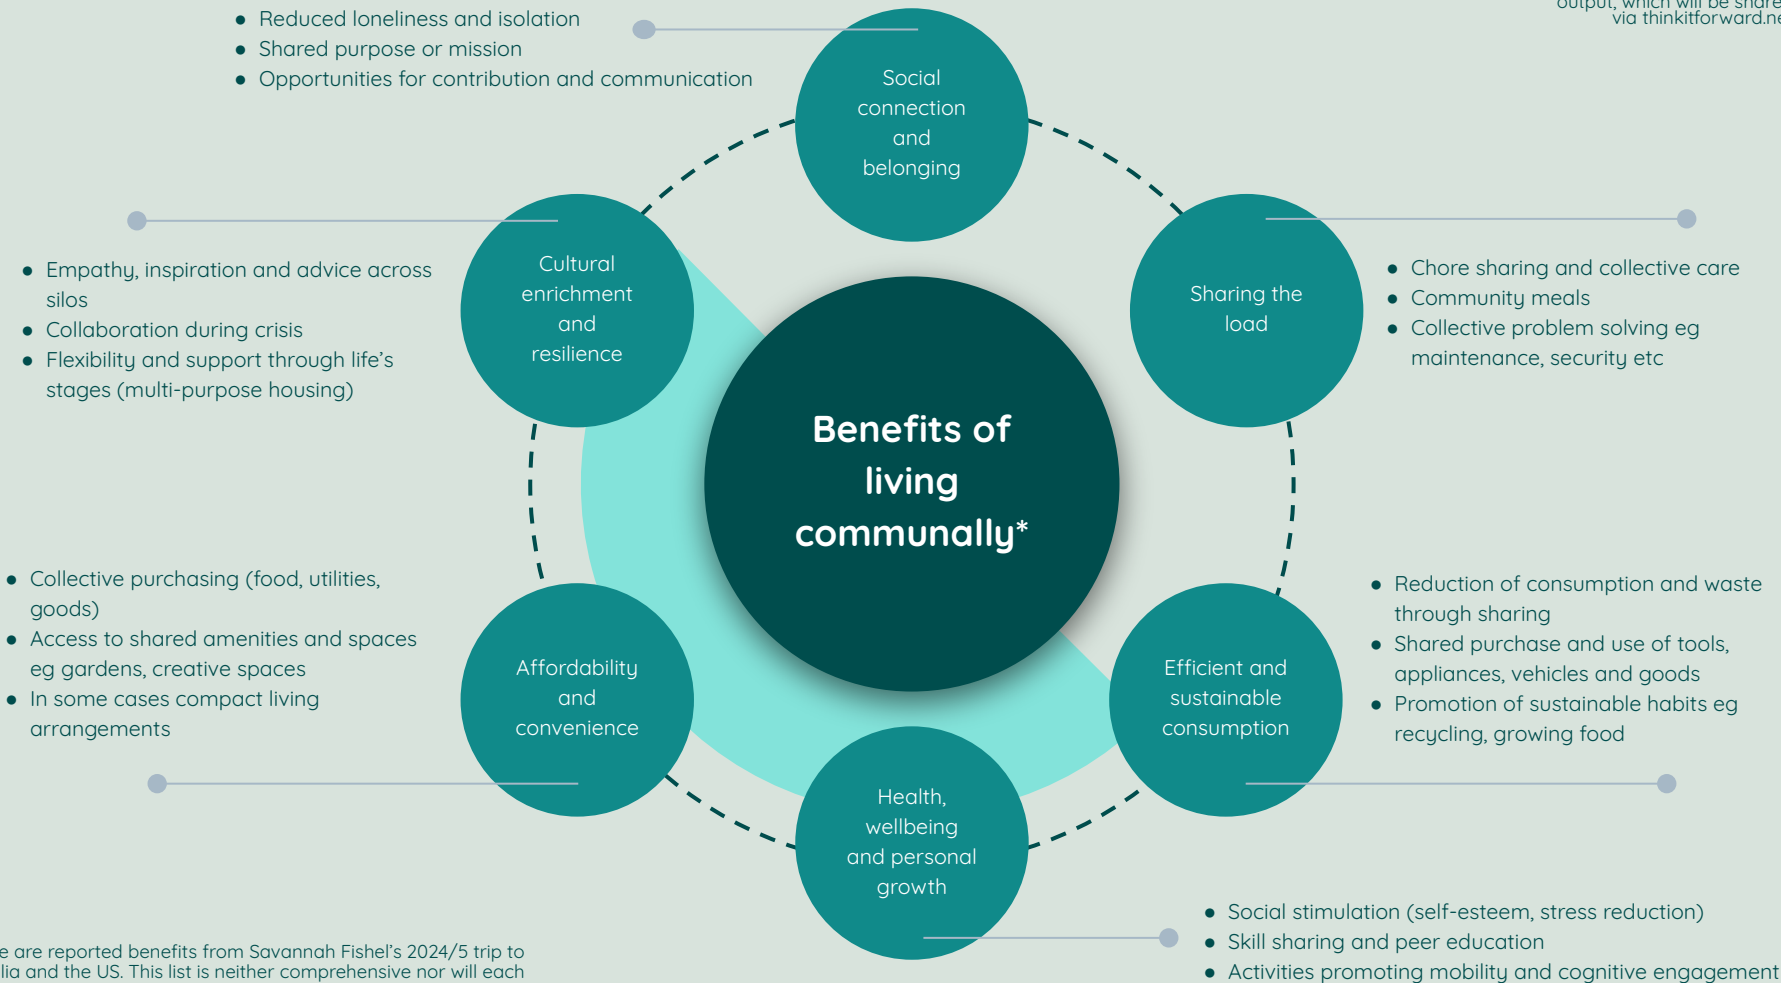

\* These are reported benefits from Savannah Fishel's 2024/5 trip to Australia and the US. This list is neither comprehensive nor will each benefit be experienced in every communal living situation.

“As a single dad if I get home late from work, there’s always people here. It’s like my daughter has lots of aunts and uncles... People watch out for each other.”

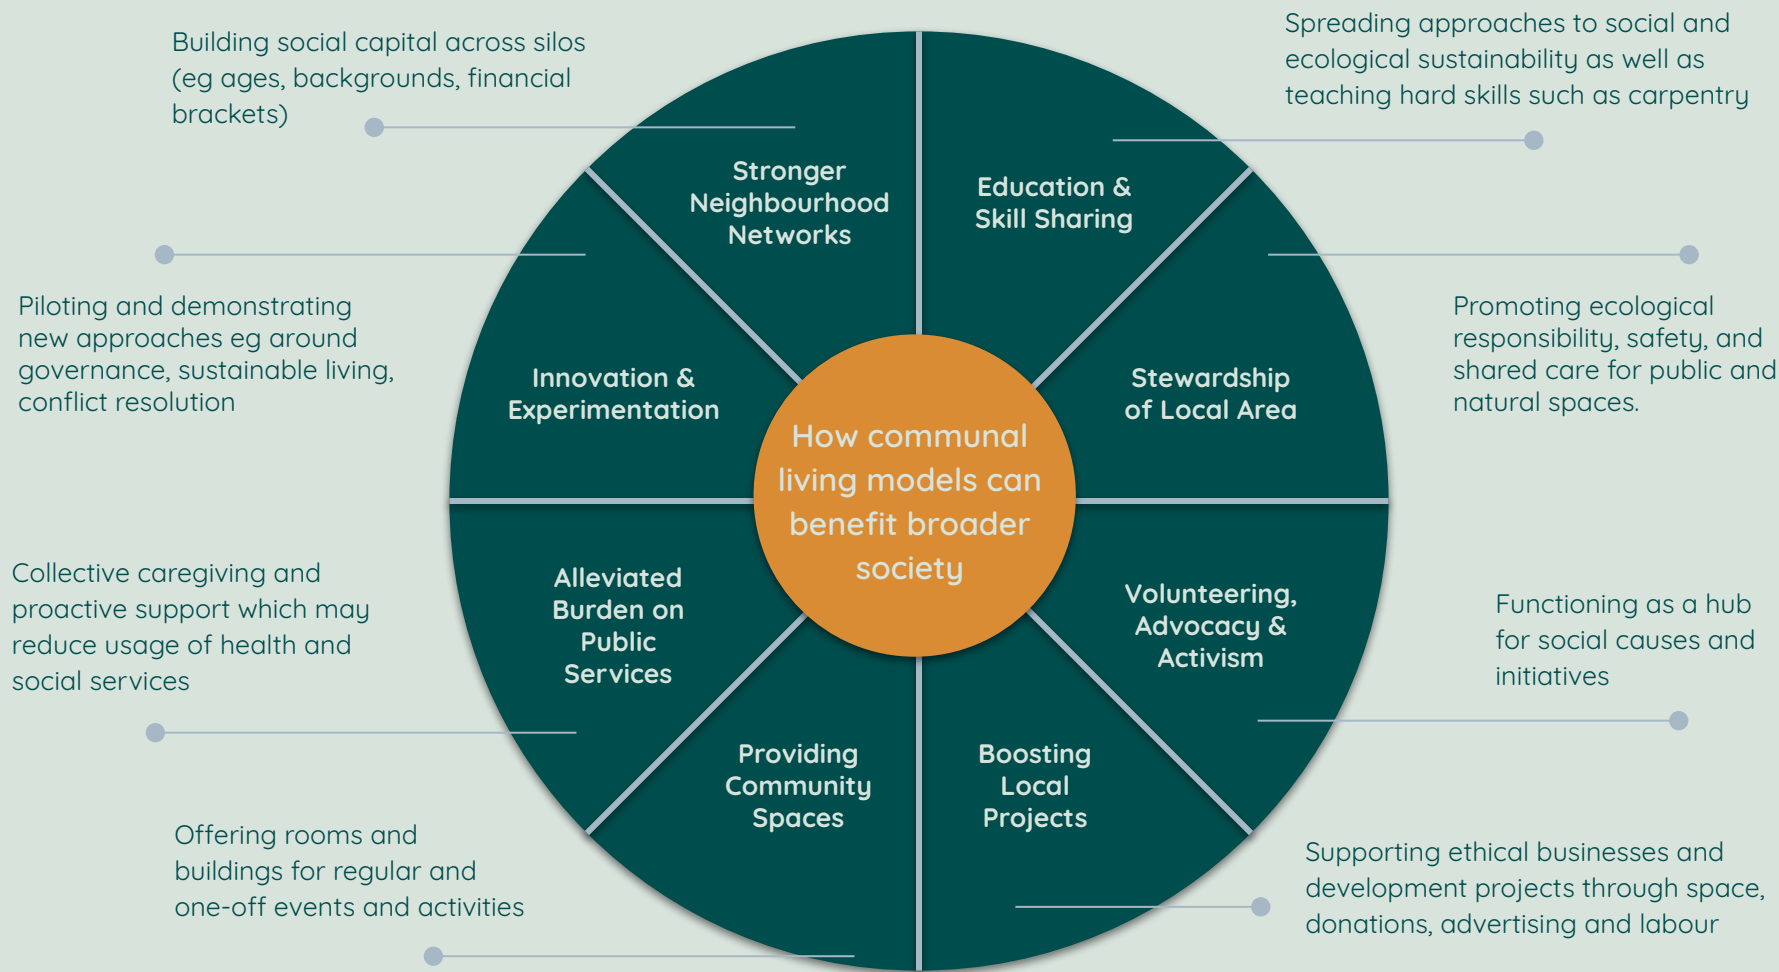

Cooperative  
resident, early 40s

\* These are reported benefits from Savannah Fishel's 2024/5 trip to Australia and the US. This list is neither comprehensive nor will each benefit be experienced in every communal living situation.

*See the following pages for examples*

# LA Ecovillage, Los Angeles, USA

Urban intentional cohousing cooperative committed to demonstrating an economically and socially sustainable way of living.

Approx 50 residents aged 3 - 87

Residents are primarily very low to middle income and intentionally diverse across age, ethnicity, gender, house composition, age and income

Urban

Move in year: 1993

Limited equity cooperative. Land Trust ensures permanent affordability through a ground lease arrangement.

“Living in LA can be ruthless, nuclear, **anonymous**. Here people know each other. There’s a coziness”

“One resident recently had a stroke and straight away we started a meal chain... I know that I can **rely on anyone**”

“The **intergenerational** aspect is particularly important - I could be around a homogeneous group”

*All quotes are from current residents. Top right photo submitted from resident. Bottom left photo taken by me.*

# Wild Sage & Silver Sage Village, Boulder, Colorado, USA

Silver Sage Village and Wild Sage are two adjacent cohousing communities, integrating aging and intergenerational living within a single development.

Wild Sage has 34 townhomes, while Silver Sage has 16 units made up of flats, duplexes and townhomes

Mixed income. Residents at Silver Sage are seniors, while Wild Sage is intergenerational

Move in year: WS 2004, SS 2007

Suburban

At both, 40% of units are affordable through City of Boulder income and deed restricted

“The goal is to generate a better, more delightful life, to share resources, and to live in a way that is more **fulfilling** and fun”

# Nightingale Village and Urban Coup, Melbourne, Aus

Nightingale Village is six neighbouring buildings designed with an emphasis on social, environmental and financial sustainability. Within it is one multi-story cohousing block, Urban Coup

Urban

Some of the buildings are 20% rented social housing, owned by a Housing Association. Other than that buy in is market value

Urban Coup has around 50 residents aged 5 - 81

Unlike the rest of the buildings, Urban Coup is an intentional community. Residents put time in their governance processes which are based on a sociocratic model.

"I've been on my own for a very long time. Cohousing just made sense... having **people around me**"

*One photo submitted from Urban Coup, the other is of Nightingale Parklife, taken from the Nightingale Village website.  
The quote is from a current Urban Coup resident*

# Neighbourisms

Informal practices of care that strengthen neighborhood bonds

# Building blocks for intergenerational communal living

*Not exhaustive  
or prescriptive.*

## Skill sharing and learning

Collaborative projects eg gardening, DIY, storytelling spaces.

## Celebration and care

Mutual aid processes, recognition of cultures, acknowledging life transitions, showing gratitude

## Evolution and renewal

Changing roles and governance approaches as needed, integrating new members, reflecting.

## Belonging and Purpose

## Community rhythms and rituals

Social and task-oriented events, sharing food, spontaneous activity

## Community agreements and processes

Proactive agreements around key decisions and conflict resolution

## Accessible communication

Digital tools for regular comms, decision-making transparency, meetings at convenient times

## Social Infrastructure

## Ageing in place

Safe and accessible architecture. Transition opportunities for life's stages eg bigger units or units without stairs

## Multi-purpose spaces

Child-friendly design, spaces appropriate for a range of activities and spontaneous connection

## Designing for connection

Through zones, visibility balanced with privacy, green space, spontaneous opportunity

## Physical Foundation

## Resource security and sustainable policy foundations

Income streams, land tenure, regulation navigation and advocacy

“If I lived in a senior community it would drive me mad. No matter how crazy it can get having kids around is enlivening and invigorating”

Cohousing  
resident, aged  
84

# Thank you!

These communities speak to the very core of our existence today:

- How do we want to live and age?
- How can we design for longevity, instead of designing in inherently short-term, age segregated ways?
- Why are so many of us so dissatisfied with our housing arrangements and social connections?
