

Healthy Ageing Challenge Social, Behavioral and Design Research

**Research with a focus on translation to enable
innovation in homes and communities**

- **DesHCA - Designing Homes for healthy Cognitive Ageing:**
co-production for impact and scale
- **ENLIVEN - Extending active life for older people with cognitive
impairment and their families through innovation in the
visitor economy of the natural environment**
- **SPACE - Addressing cognitive health inequality by investigating
the impacts, and possible mechanistic pathways, of urban
environments on healthy ageing and cognitive health, and on
diverse individuals and communities.**
